LIMITED WARRANTY

The Little Tikes Company makes fun, high-quality toys. We warrant the original purchaser that the frame of this product is free of defects for 1 year from the date of purchase, and all other parts are free of defects in material or workmanship for 90 days* from the date of purchase (dated sales receipt is required for proof of purchase). At the sole election of The Little Tikes Company, the only remedies available under this warranty will be either replacement of the defective part of the product or refund the purchase price of the product. This warranty is valid only if the product has been assembled and maintained per the instructions. This warranty does not cover abuse, accident, cosmetic issues such as fading or scratches from normal wear, or any other cause not arising from defects in material and workmanship.

U.S.A and Canada: For warranty service or replacement part information, please visit our website at www.littletikes.com, call 1-800-321-0183 or write to: Consumer Service, The Little Tikes Company, 2180 Barlow Road, Hudson OH 44236, U.S.A. Some replacement parts may be available for purchase after warranty expires—contact us for details.

* Trampoline Warranty:
We warrant to the original purchaser that the frame in this product is free of defects in materials or workmanship for 1 year from the date of purchase, and all other parts are free of defects in material or workmanship for 90 days from the date of purchase (dated sales receipt is required for proof of purchase). Outside U.S.A and Canada: Contact place of purchase for warranty service.

This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

WARNING

• Warning. Only for domestic use.
• Adult assembly and supervision required.
• You must thoroughly read these materials prior to assembling and using this trampoline / trampoline enclosure.
• Save this manual for future reference.
• Maximum weight of the user shall not exceed 105 lbs. (47.63 kgs)
• Do not allow more than one person on the trampoline (inside the trampoline enclosure) at any time.
• Do not allow young children to use unless supervised by an adult.
• This product is intended for domestic family use only.
• This product is intended for use by children ages 3 - 10 years.
• This product is recommended that at least 2 persons participate in the assembly of this product.

Please keep this manual as it contains important information.

IMPORTANT INFORMATION

Trampolines are great fun when used correctly. Most injuries are caused during the use of the trampoline, not because of their construction.

Read these instructions and warnings carefully and ensure you follow them at all times. Follow all assembly and maintenance instructions closely to ensure the equipment is safe to use and lasts as long as possible.

WARNING - GENERAL

Read all instructions before using the trampoline and trampoline enclosure. Warnings and instructions for the care, maintenance, and use of this trampoline and trampoline enclosure are included to promote safe, enjoyable use of this equipment.

• This trampoline is only suitable for domestic family use. For outdoor use, please contact the manufacturer.
• Not recommended for use by children under 3 years or over 10 years of age. Max. weight limit: 105 lbs. (47.63 kgs).
• The trampoline is designed for installation on flat surfaces at least 8’6” (2.5m) clear space around the trampoline.
• Do not place on a hard surface (e.g. concrete or asphalt). Serious injury may occur.
• Above the trampoline, ensure there is clear and free space to the expected jumping height, it is strongly advised not to place the trampoline under the canopy of surrounding trees.
• Inspect the trampoline and trampoline enclosure before use. Make sure the frame padding is correctly and securely positioned. Do not bouncing on any worn, defects or missing parts.
• For further information or additional instruction materials on skill training, contact a competent trampoline instructor.

WARNING - USAGE

• Do not attempt or allow stunts including somersaults, these are dangerous moves that should only be performed in the presence of a skilled trainer, and with appropriate equipment, serious injury is likely to occur if stunts are attempted on this trampoline. Landing on the head or neck can cause serious injury, paralysis or death, even when landing in the middle of the bed.
• Children and unpracticed users must always jump under supervision by an experienced person, it is strongly recommended to use spotters at all times.
• Do not allow more than one person on the trampoline (inside trampoline enclosure) at the same time.
• Do not make the trampoline too tight, secure trampoline/enclosure boundary may result in serious injury, even when landing in the middle of the bed.
• Remove glasses, watches, jewelry and chains, ornaments, clasps and other sharp objects. Empty your pockets before starting to jump.
• Do not use the trampoline in the dark.
• Do not put any objects or toys on the trampoline and trampoline enclosure.
• Animals are not allowed on the trampoline and trampoline enclosure.
• Do not smoke while using the trampoline.
• Do not use when wet.
• Do not use the trampoline while under the influence of alcohol or drugs.

To assemble this trampoline, you need phillips screwdriver (not included) and our special spring loading tool provided with this product. During periods of non-use, this trampoline can be easily disassembled and stored. Please make sure that only one person at any one time uses the trampoline. To prevent the trampoline mat from getting cut or damaged please do not allow any pets onto the mat. Always inspect the trampoline and enclosure before each use for worn, defective or missing parts. A number of conditions could arise that may increase your chances of getting injured. Please be aware of:
• Misusing, improperly positioned, or insecurely attached frame paddding, trampoline enclosure or frame padding and pole caps.
• Punctures, frays, tears, or holes worn in the bed, barrier or support system (frame) padding.
• Deterioration in the stitching or fabric of the bed, barrier or support system (frame) padding.
• Bent or broken frame.
• Ruptured springs.
• A sagging trampoline bed.
• Broken, missing, or damaged springs.
• Prpominations of any types (especially sharp) on the frame, springs, or mat.

IF YOU FIND ANY OF THE PREVIOUS CONDITIONS, OR ANYTHING ELSE THAT MIGHT CAUSE HARM TO ANY USER, THE TRAMPOLINE SHOULD BE DISASSEMBLED OR SECURED FROM USE UNTIL THE CONDITION(S) HAS BEEN RESOLVED.

Care and Maintenance

This trampoline and trampoline enclosure were designed and manufactured with quality materials and craftsmanship. If proper care and maintenance is provided, it will provide all jumpers with years of exercise, fun, and enjoyment as well as reduce the risk of injury. Please follow the guidelines listed below:
• This trampoline is designed to a certain amount of weight and use. Person should weigh less than 105 lbs. (47.63 kgs).
• Please make sure that only one person at any one time uses the trampoline.
• In order to prevent the trampoline mat from getting cut or damaged please do not allow any pets onto the mat.
• Always inspect the trampoline and enclosure before each use for worn, defective or missing parts. A number of conditions could arise that may increase your chances of getting injured.

Carry out checks and maintenance of the main parts (frame, suspension system, bed, pads and enclosure) at regular intervals. If these checks are not carried out the trampoline could become dangerous. It is of particular importance that these be followed at the beginning of each season, as well as at regular intervals during the usage season.
• Check all nuts and bolts for tightness and tighten when required.
• Check all spring loaded (pit-pin) joints are still intact and cannot come undone during play.
• Check all covers for bolts and sharp edges and replace when required.
• Check for evidence of wear or deterioration and replace if needed in accordance with these instructions.
• Make sure dry enough for storage.

High Wind

The trampoline can be blown around by high winds. If you expect high winds, the trampoline should be moved to a sheltered location, taken apart, or tied down to the ground with ropes and stakes (not included). At least three ropes and three stakes should be used. Make sure to attach the ropes to the top of the frame; do not simply secure the legs or the bases to the ground, as they can separate from the frame sockets. The top of the stakes should be covered, if necessary, so that users will not be injured by falling onto the stakes.

Moving the Trampoline

If the trampoline needs to be moved, it should be moved by two persons, kept horizontal, and lifted slightly. All connector points should be wrapped and secured with weather resistant tape, such as duct tape. This will keep the frame intact during the move and prevent the connector points from disconnecting and separating. If necessary, the trampoline can be taken apart for moving. To take the trampoline apart, follow the assembly steps in reverse order (steps 1-7). Do not attempt to take frame sections, legs, or bases apart before the mat and springs have been removed.

Assembly and Moving Hints!

Select a location where you want the trampoline permanently prior to assembly. Do not pick up the frame more than 2 inches off the ground, picking it up too high can cause the frame to warp. If the frame does warp, put the trampoline down, press down on the part that is warped. The tension of the springs will flatten the frame.

Disassembly

To disassemble the trampoline, follow assembly STEP 1 through STEP 7 in reverse order. Do not attempt to disassemble any frame components before the springs and the mat have been removed. Use gloves to protect your hands from pinch points during disassembly.

Assembly and Moving Hints!

Select a location where you want the trampoline permanently prior to assembly. Do not pick up the frame more than 2 inches off the ground, picking it up too high can cause the frame to warp. If the frame does warp, put the trampoline down, press down on the part that is warped. The tension of the springs will flatten the frame.

Disassembly

To disassemble the trampoline, follow assembly STEP 1 through STEP 7 in reverse order. Do not attempt to disassemble any frame components before the springs and the mat have been removed. Use gloves to protect your hands from pinch points during disassembly.
**ASSEMBLY INSTRUCTIONS**

**IMPORTANT NOTICE**

NEVER use the trampoline without attaching the frame pad. Properly tie down the frame pad before each use!

Flip-up the safety pad, position the trampoline on the frame, and make sure the safety pad covers the frame and all springs.

**DO NOT use the trampoline if one spring or triangle ring is damaged or missing.**

Perform a complete inspection of the trampoline to make sure all parts are assembled and attached properly.

Read this entire manual and make sure all jumpers are familiar with all the safety rules printed in the manual and on the various warning signs. Instruct all jumpers in the basic bounces described in the manual.

**STEP 7 - Enclosure, Mat And Accessories Assembly**

Enclosure netting should wrap around the outside of the straight frame and curve frame tubes. Pull over the enclosure evenly all the way round and work it down.

Adjust netting with pocket to fit by pulling down the two ends of the pocket. Pockets should be secured on each of the 3 arches. Velcro® the pockets shut, securing the frame and setting.

After all three "arches" are attached to the enclosure assembly, pull the enclosure netting down and over the straight frame and curve frame tubes as shown.

**WARNING**

 NEVER use the trampoline without attaching the frame pad. Properly tie down the frame pad before each use!

**TRAMPOLINE SAFETY INSTRUCTIONS**

**A. NOTICE TO SUPERVISOR**

1. Enforce all safety rules and be familiar with all the information provided in the manual prior to allowing anyone on the trampoline.
2. Perform a complete inspection of the trampoline and top pad. Any damaged or broken parts must be replaced with manufacturer-approved parts.
3. Prevent and control unattended access to the trampoline.
4. The trampoline enclosure is only to be used as an enclosure for a trampoline used in conjunction with the trampoline enclosure. Do not use the trampoline enclosure without the trampoline. Do not clamp frame tubes to the ground, fence, trees, or other objects.
5. The maximum user weight for the trampoline is 100 lbs. (45.4 kg) for adults and 100 lbs. (45.4 kg) for children.
6. Observe and enforce all safety rules.
7. The trampoline enclosure is only to be used as an enclosure for a trampoline used in conjunction with the trampoline enclosure.
8. Do not exceed the maximum user weight for the trampoline.
9. Do not attach anything to the barrier that is not a manufacturer-approved accessory or part of the enclosure system.
10. Do not exceed the maximum user weight for the trampoline.
11. Do not use the trampoline on concrete, asphalt or any other hard surface.
12. The trampoline enclosure is only to be used as an enclosure for a trampoline of a size for which the enclosure is designed.
13. The owner and supervisors of the trampoline are responsible for making sure all users are aware of practices specified in this manual.
14. Do not install trampoline on concrete, asphalt or any other hard surface.
15. Adequate overhead clearance is essential. A minimum of 24 ft from ground level is recommended. Provide clearance from wires, free limbs, and other possible hazards. Be aware of the following when selecting a place for your trampoline:

**Make sure it is placed on a level surface at least 6’6” (2m) from any structure or obstruction such as a fence, garage, house, overhanging branches, laundry lines or electrical wires.**
TIPS TO REDUCE THE RISK OF ACCIDENTS

All jumpers need to be supervised, regardless of skill level or age.

**Jumpers role in accident prevention:**
The key here is to stay in control of your jumps. Do not move onto more complicated, more difficult maneuvers until you have mastered the basic, fundamental bounce. Education is also key to safety and very important. Read, understand, and practice all safety precautions and warnings prior to using the trampoline. A controlled jump is when you land and take off from the same location. For additional safety tips and instructions, contact a certified trampoline instructor.

**Supervisor’s or owner’s role in accident prevention:**
Supervisor's need to understand and enforce all safety rules and guidelines. It is the responsibility of the supervisor to provide knowledgeable advice and guidance to all jumpers on the trampoline. If supervision is unavailable or inadequate, the trampoline should be stored in a secure place, disassembled to prevent unauthorized use, or covered with a heavy tarp that can be locked or secured with locks or chains.

ADDITIONAL TRAMPOLINE SAFETY INSTRUCTIONS

**JUMPERS**
- Do not use the trampoline if you have consumed alcohol or drugs.
- Remove all hard and sharp objects from person before using trampoline and trampoline enclosure.
- Should climb on and off in a controlled and careful manner.
- Never jump on or off the trampoline and never use the trampoline as a device to bounce onto or into another object.
- Always learn the basic bounce and master each type of bounce before trying more difficult types of bounces. Review the Basic Trampoline Bounces Section to learn how to do the basics.
- To stop your bounce, flex your knees when you land on the mat with your feet.
- Always be in control when you are bouncing on the trampoline. A controlled jump is when you land at the same spot that you took off from. If at any time you feel out of control, try to stop your bouncing.
- Do not jump or bounce for prolonged periods of time or too high for a number of jumps.
- Keep your eyes on the mat to maintain control. If you do not, you could lose balance or control.
- Never have more than one person on the trampoline at any one time.
- Always have a supervisor watching you when you are on the trampoline.

**SUPERVISORS**
- Educate yourself with the basic jumps and safety rules. To prevent and reduce the risk of injuries, enforce all safety rules and ensure that new jumpers learn the basic bounces before trying more difficult and advanced jumps.
- All jumpers need to be supervised, regardless of skill level or age.
- Never use the trampoline when it is wet, damaged, dirty, or worn out. The trampoline should be inspected before any jumpers start bouncing on it.
- Keep all objects that could interfere with the jumper away from the trampoline. Be aware of what is overhead, underneath, and around the trampoline.
- To prevent unsupervised and unauthorized use, the trampoline and trampoline enclosure should be secured when not in use.

LESSONS

The following lessons are suggested in order to learn basic steps and bounces before moving onto more difficult, complicated bounces. Before actually getting on and using the trampoline, you should read and understand all safety instructions. A complete discussion and demonstration of body mechanics and trampoline guidelines should occur between the supervisor and student as well.

**Lesson 1**
A. Mounting and Dismounting - Demonstration of proper techniques.
B. The Basic Bounce-Demonstration and practice.
C. Braking (Check the Bounce-Demonstration) and practice. Learn to brake on command.
D. Hands and knees-demonstration and practice. Stress should be on four-point landing and alignment.

**Lesson 2**
A. Review and practice of techniques learned in Lesson 1.
B. Knee Bounce-Demonstration and practice. Learn the basic, down to knee and back up before trying half twist to the left and right.
C. Seat Bounce-Demonstration and practice. Learn the basic, seat bounce then add a knee bounce, hands and knees; repeat.

**Lesson 3**
A. Review and practice skills and techniques learned in previous lessons.
B. Front Drop-To avoid mat burns and teach the front bounce position. All students should be requested to assume the prone position (face down on the ground) while the instructor checks for faulty positions that could cause injury.
C. Start with a hands and knees bounce and then extend body into prone position, and on the mat and return to feet.
D. Practice Routine Hands and knees Bounce, Front Bounce, back to feel, Seat Bounce, back to feet, Seat Bounce, back to feel.

**Lesson 4**
A. Review and practice skills and techniques learned in previous lessons.
B. Half-turn
   - Start from front drop position and as you make contact with mat, push off with arms in either the right or left direction and turn head and shoulders in same direction.
   - During turn, be sure to keep back parallel to mat and head up.
   - After completing turn, land in front drop position.

After completing this lesson, the student now has a basic foundation of trampoline bounces. Jumpers should be encouraged to try and develop their own routines with the emphasis on control and form.

ASSEMBLY INSTRUCTIONS

**STEP 5 - Spring Loading Instructions (cont.)**
Attach a spring at every 3 holes and corresponding triangle-rings. For even distribution of tension and ease of assembly, springs should be placed on opposite side of the mat/frame...i.e. 3 then 21, 33 then 15, etc. In addition to the previously instaled springs, you should have springs at 3, 9, 15, 21, 27 and 33 as shown.

**STEP 6 - Enclosure Frame Assembly**

Insert a foam tube (T) over each straight frame tube (S). All straight frame tubes must have foam around them.

- Secure the tubes of the arch to gather using a self-locking screw (M). Tighten with screwdriver (W).
- Assemble horizontal tube with foam (H) with two curved frame tubes (J) and curved frame tube (J).
- Assemble horizontal tube with foam (H) with two curved frame tubes with foam (J).

Insert a foam tube (T) even each straight frame tube (S).
ASSEMBLY INSTRUCTIONS

STEP 3 - Complete for all 6 corner top rails

Insert straight frame tubes into the socket of the corner top rails (S). Make sure the hole on the straight frame tube (L) matches with the hole in the socket on corner top rail (S). Gently rotate the straight frame tube to align holes if needed.

STEP 4 - Trampoline Mat Assembly

Insert bulk (L) through an ar with washer (W) then through front opening hole in straight frame tube. Secure back with an ar washer (W), a spring washer (P) and cap nut (N). Tightly butt assembly using wrench (W) to hold cap nut in place while tightening bolt with screwdriver (V).

STEP 5 - Spring Loading Instructions

There are a total of 36 triangle-rings sewn on the mat and 36 holes underneath safety pad. Loop elastic on each corner over each of the straight frame tubes. Slide elastic down to the base as shown.

SPRING LOADING CAUTIONS

- Make sure flip up the safety pad for ease of installation of springs.
- Two adults are required in this assembly step.
- CAREFUL: When attaching the springs, please do not pull your hands, legs, or body close to the connector points.
- Wear heavy duty work gloves to protect your hands.
- For ease of assembly, use special spring loading tool (K).

ATTACHING SPRING

Attach springs at the corner top as shown in diagram below. For even distribution of tension and ease of assembly, springs should be placed on opposite side of the mat/frame. i.e. 5, 6 then 23, 24. Complete spring installation for numbers below. You should now have the following 12 springs installed: ZERO, 5, 6, 11, 12, 17, 18, 23, 24, 29, 30 and 35.

ATTACHING SPRING

Attach the R-hook galvanized spring (K) with “R” hook end to the triangle ring on the mat as shown. Holding the spring at 45 degrees in relation to the mat surface will help secure it more easily on the frame. Hold the spring loading tool underneath and pull spring hook towards the point on the top rail frame. Drop hook into frame hole until latch is completely and tip it down if hook is not completely in the hole.

The Basic Bounce

1. Start with basic bounce. And keep it low.
2. Land on knees, keeping back straight, body erect and use your arms to maintain balance.
3. Bounce back to basic bounce position by swinging arms up.

Front Bounce

1. Start with a low bounce.
2. Land in a flat sitting position.
3. Place hands on mat beside hips, do not lock your elbows.
4. Return to erect position by pushing with hands.

Knee Bounce

1. Start with basic bounce and keep it low.
2. Land on knees, keeping back straight, body erect and use your arms to maintain balance.
3. Bounce back to basic bounce position by swinging arms up.

180° Degree Bounce

1. Start with front bounce position.
2. Push off with left or right hand and arms (depending on which way you wish to turn).
3. Maintain hand and shoulder in the same direction and keep back parallel to mat and head up.
4. Land in prone position and return to standing position by pushing up with hands and arms.

BASIC TRAMPOLINE BOUNCES

1. Push off with hands and arms.
2. Land in prone (face down) position and keep hand and arms extended forward on mat.
3. Push off the mat with arms to return to standing position.

- Jumpers should wear T-shirt, shorts or sweats, and regulation gymnastics shoes, heavy socks, or be barefoot. If you are just beginning, you may want to wear long sleeve shirts and pants to protect against scrapes and abrasions until you master correct landing positions and form. Do not wear hard sole shoes, such as tennis shoes on the trampoline, as this will cause excessive wear on the mat material.
- You should always count and dismount properly to avoid injury.
- Do not bounce recklessly on the trampoline since this will increase your chances of getting injured. The key to safety and having fun on the trampoline is control and mastering the various bounces. Never try to do multiple bounces at once of views you will be practicing in your head.
- Poor Maintenance of Trampoline: A trampoline in poor condition will increase your chances of getting injured. Please expect the trampoline before each use for bent steel tubes, torn mat, loose or broken springs, and overall stability of the trampoline.
- Weather Conditions: Please be aware of the weather conditions when using the trampoline. If the mat of the trampoline is wet, the jumper could slip and injure himself. If it is too windy, jumpers could lose control.
- Use the trampoline only when the jumping mat is clean and dry. A wet jumping mat is extremely slick and prevents a stable landing. Use the trampoline only when the jumping mat is clean and dry.
- Jumpers should wear T-shirt, shorts or sweats, and regulation gymnastics shoes, heavy socks, or be barefoot. If you are just beginning, you may want to wear long sleeve shirts and pants to protect against scrapes and abrasions until you master correct landing positions and form. Do not wear hard sole shoes, such as tennis shoes on the trampoline, as this will cause excessive wear on the mat material.
- You should always count and dismount properly to avoid injury.
- Do not bounce recklessly on the trampoline since this will increase your chances of getting injured. The key to safety and having fun on the trampoline is control and mastering the various bounces. Never try to do multiple bounces at once of views you will be practicing in your head.
- Poor Maintenance of Trampoline: A trampoline in poor condition will increase your chances of getting injured. Please expect the trampoline before each use for bent steel tubes, torn mat, loose or broken springs, and overall stability of the trampoline.
- Weather Conditions: Please be aware of the weather conditions when using the trampoline. If the mat of the trampoline is wet, the jumper could slip and injure himself. If it is too windy, jumpers could lose control.
- Use the trampoline only when the jumping mat is clean and dry. A wet jumping mat is extremely slick and prevents a stable landing.
- When the trampoline is not in use, store it in a secure place so that unsupervised children cannot play on the trampoline.
Please refer to this page for parts descriptions and letters. The assembly steps use these descriptions and letters as reference for your convenience. Make sure that you have all parts listed.

**Parts List**

**Tools required**

- (not included)

**ASSEMBLY INSTRUCTIONS**

**STEP 1 - Support Assembly**

1. Insert a vertical leg extension (F) through hole on each end of a plastic horizontal leg base (C). Repeat for remaining 2 plastic horizontal leg bases (C).
2. Insert a plastic vertical leg extension (D) over each vertical leg extension (F). Repeat for remaining 5 vertical leg extensions (F).
3. Layout 3 sets Support Assemblies (pre-assembled in STEP 1) as shown above.

**STEP 2 - Frame Layout**

1. Insert the corner top rail with socket (E) to the Support Assembly as shown. Repeat this for all corner top rails (E).
2. IMPORTANT: hole in corner top rail should align to the hole in vertical leg extension.
3. There are total of 12 pieces of tubing and 3 sets Support Assemblies (pre-assembled in STEP 1) that are needed to assemble the frame.
   - Holes must face up.
   - Assemble top rail (G) into each end of corner top rail with socket (E). To connect parts, simply slide the section of tubing that is smaller on one end into the adjacent section that has a larger opening as shown.
   - IMPORTANT: be sure the curve side of the plastic horizontal leg base (C) and the curve of the top rails (G) are facing outward.

**Adult assembly required**

- Safety glasses should be worn during the assembly of trampoline.

- Tools required

- (not included)

- Insert a vertical leg extension (F) through hole on each end of a plastic horizontal leg base (C). Repeat for remaining 2 plastic horizontal leg bases (C).

- Insert a plastic vertical leg extension (D) over each vertical leg extension (F). Repeat for remaining 5 vertical leg extensions (F).

- Recess on plastic vertical leg extension (D) must fit into leg base (C) as shown.

- Insert the corner top rail with socket (E) to the Support Assembly as shown. Repeat this for all corner top rails with sockets (E).

- IMPORTANT: hole in corner top rail should align to the hole in vertical leg extension.

- Assemble top rail (G) into each end of corner top rail with socket (E). To connect parts, simply slide the section of tubing that is smaller on one end into the adjacent section that has a larger opening as shown.

- IMPORTANT: be sure the curve side of the plastic horizontal leg base (C) and the curve of the top rails (G) are facing outward.
